To Whomsoever It May Concern

I am pleased to recommend **Mr. Asadbek Xodjayev** for admission to your Master's program. I taught Asadbek in the Network Principles course during the Spring 2024 semester at Webster University, Tashkent.

Asadbek was a dedicated and hardworking student who demonstrated a solid understanding of networking concepts and strong analytical skills. He consistently showed enthusiasm for learning, completed his coursework responsibly, and participated actively in class.

Based on his academic performance and commitment to his studies, I am confident that he has the potential to succeed in graduate-level education. I strongly recommend him for admission to your Master's program.

Please feel free to contact me if further information is required.

Yours sincerely,
